

Ananya Soni

anuananya100906@gmail.com — +91 97171 37464 — GitHub — LinkedIn — LeetCode

Summary

B.Tech IT student (Batch 2028) at Jaypee Institute of Information Technology with strong foundations in C, C++, Python, and MySQL. Solved 245+ problems on LeetCode (103 Easy, 130 Medium, 12 Hard). Built a multi-client TCP chat server in C, an automated real-estate web scraper with database integration, and co-developed a 2D story-driven game. Certified in Data Analysis with Python (freeCodeCamp) and Oracle Cloud AI Foundations. Seeking internships in Software Engineering, AI/ML, or Data Analytics.

Education

B.Tech in Information Technology	2024 – 2028
Jaypee Institute of Information Technology (JIIT), Noida	
CGPA: 8.8	

Class X & XII	2021 – 2024
Somerville School, Greater Noida	
Class XII: 91.6%	
Class X: 93.4%	

Competitive Programming

LeetCode — Ananya100906 245+ problems solved (103 Easy, 130 Medium, 12 Hard)
Topics covered: Arrays, Strings, Linked Lists, Trees, Graphs, Dynamic Programming, Sorting & Searching

Projects

Multi-Client Chat Server (CLI)	<i>C, Socket Programming, Multithreading, TCP/IP</i>	GitHub
---------------------------------------	--	--------

- Engineered a TCP-based multi-client chat server in C using socket programming, supporting concurrent users via a thread-per-client architecture with POSIX threads.
- Implemented real-time message broadcasting, username-based session management, and graceful client disconnection handling — demonstrating solid systems programming skills.
- Integrated a server-controlled multiplayer Guess-the-Number game to demonstrate shared state management across concurrent client sessions.

Real Estate Data Scraper & Database Pipeline	<i>Python, Selenium, MySQL, Web Scraping</i>	GitHub
---	--	--------

- Built an automated Python scraper using Selenium to extract property listings from dynamically rendered pages, handling infinite scrolling, async content loading, and dropdown interactions.
- Designed a structured MySQL schema to store scraped data (price, location, specs); implemented validation and deduplication logic to ensure data integrity.
- Delivered an end-to-end data pipeline: scrape → parse → validate → store — directly applicable to real-world data engineering and analytics workflows.

2D Story-Based Game — Among the Ants	<i>Godot Engine, GDScript, GitHub</i>	GitHub
---	---------------------------------------	--------

- Collaborated in a 3-member team to design and develop a 2D interactive game with player movement, physics interactions, and branching dialogue systems.
- Managed iterative testing cycles and version control using GitHub throughout the full project lifecycle.

Skills

Languages: C, C++, Python, Java, JavaScript

Core CS: Data Structures & Algorithms, OOP, SDLC, Basic System Design

Web & Frameworks: React, HTML, CSS, PHP

Data & AI/ML: Pandas, NumPy, Data Analysis, Selenium, Scikit-learn (basic)

Databases: MySQL

Networking: TCP/UDP, Socket Programming, Client-Server Architecture, Wireshark

Tools & Platforms: Git, GitHub, Android Studio, VS Code

Certifications

- freeCodeCamp — Data Analysis with Python
- Oracle Cloud Infrastructure — AI Foundations Associate
- Kaggle — Intro to Machine Learning

Extracurricular Activities

Creative & Innovative Cell in Robotics (CICR), JIIT — Core Team Member

Contributed to technical initiatives, hands-on robotics projects, and peer coordination across engineering events.
